

With a mission to generate economic benefits for Atlanta and Georgia, as well as enhance the quality of life for every Georgian, GWCCA strives to deliver unconventional solutions for people, planet and performance. As responsible neighbors, our commitment is to operate efficiently and provide leadership to produce net zero events. This is evident as we are one of the largest convention centers to achieve and re-certify LEED Gold.

Alternative Transportation

Getting to Championship Campus is convenient by bike, MARTA, rideshare or foot. Additionally, Chargepoint dual-port electric vehicle charging stations are in each garage with the entire campus able to charge 26 vehicles at once.

Composting

We work closely with internal and external partners to reduce the amount of material resources sent to landfills. Kitchen waste is composted and used to support local and urban farms.

Donation Program

We partner with organizations to donate a variety of materials from furniture and plants to supplies, textiles and tools. Partners include:

- Atlanta Habitat for Humanity
- Furniture Bank of Metro Atlanta
- Atlanta ToolBank
- Meals on Wheels
- re:loom
- Salvation Army
- Trees Atlanta

Energy

Conserving energy, saving money, equipment upgrades and a creative financing solution are all part of GWCCA's Guaranteed Energy Savings Performance Contract with Trane. It is the largest such stand-alone project in Georgia, and also the largest in the country for public assembly venues.

Food Rescue

Joining forces with One Heart Ministries, Atlanta Community Food Bank, and Second Helpings, we donate excess food and team members' time to support the critical needs of our community. This past fiscal year, more than 900 pounds of food was donated to Second Helpings.

Email impact@gwcc.com to learn more and schedule a Sustainability Tour of the Georgia World Congress Center.
